Nate

I have attached a few notes, I took along the way to understand Data dog and some meeting notes

Problem:

Our DevOps team purchased Data Dog only thinking of the DevOps Team. They have identified

Mapping for Document

Section	Purpose
<input type="checkbox"/> Data Dog Overview	Just notes around what I learned about Data Dog
<input type="checkbox"/> Incident Release	Identifies the current process of our Incident Management which these measure KPIs but be proactive against incidents
<input type="checkbox"/> Plan to Move	Notes on the reasons why we need to move to more Data Dog identification
<input type="checkbox"/> APM Implementation	Just notes I have taken on how to Implement APM which is the golden path to code

otes as well to identify our objective within Dealerware

their top 5 KPIs based on the DORA Metrics

alarms are supposed to help our organization not
tion from Engineering
lan switching away from our current bug snag embedded
